

BUSINESS IS GOOD

We wish to thank our friends for the liberal patronage given us this spring. Words of appreciation for favors shown are always in order, and we take this opportunity to say "Thank you," one and all.

We wish also to call your attention to the fact that we have recently received three carload shipments:

Carload Thomas Crown Mowers and Rakes.

Carload Tennessee Wagons.

Carload Ames Buggies.

The Thomas Crown Mower is the double speed mower. It's high speed is great for lespedeza and all hay that is hard to cut. It's low speed is sufficient for pea hay, etc., and it is advisable of course, to use the low speed whenever possible, as any machine will last longer the lower the speed.

This is our second carload of Thomas Mowers and we have heard lots of compliments on this machine from farmers to whom we have sold. Fact is, the favorable impression this machine has made in our midst has prompted us to order this second carload shipment, and we are now ready, Mr. Farmer, to serve you with the Thomas Crown—a machine that is now no longer an experiment in Haywood county.

It is unnecessary to say much about the "Tennessee" wagon and "Ames" buggy. These two vehicles have been standards in this section for so long a time that their qualities are well known.

If you are in the market for a mower, wagon or buggy, or anything else in the hardware, furniture and implement lines, call on us.

Mr. and Mrs. C. E. Weddington are the proud parents of a baby boy who came to their home on June 5.

There will be no meeting of Forrest Chapter, U. D. C., during the month of June on account of the Chautauqua.

B. W. Williams, aged 45 years, died at 1:15 p. m. at his home in the Tabernacle neighborhood, yesterday, after an illness of a week. Funeral services and interment will take place at Tabernacle. Services will be conducted by Rev. G. W. Evans of Clinton, Ky. Deceased leaves a wife and several children to whom the sympathy of the entire community is extended.

Miss Willie Murchison presented her music class in a musical recital at the High School Friday morning.

The auditorium was filled with patrons and friends who enjoyed the program very much, each number of which showed careful training and diligent practice. Miss Murchison is one of the best teachers in the city and her pupils did credit to her work on this occasion.

On account of the wind and rain Monday night the Chautauqua tent was not in shape for the opening Tuesday afternoon. For this reason the entertainments Tuesday afternoon and night were held at the opera house. It is expected that all other meetings will be held in the tent located on the Bradford lot on East Main street.

Hon. J. D. Senter of Humphreys, candidate for congress from this, the sixth congressional district, has been mingling with the voters of Haywood county this week. He is a man of refinement and culture and bears the unqualified endorsement of his home people. This is the best recommendation a man can get. Mr. Senter speaks most favorably of his reception in Haywood.

Elsewhere in this issue will be found the announcement of J. W. Dickinson as a candidate for state senator from this senatorial district. Mr. Dickinson was born and reared in this community. He is a life-long democrat, a man of high moral character, well qualified to perform the duties of the office he seeks. It is upon his record as a man and democrat that he asks the support of the voters of Haywood county in this senatorial primary.

The annual meeting at Joyner's Camp Ground will open Thursday, July 20th, at 8 p. m. G. P. Thomas of New Albany, Miss., will lead the singing. Rev. H. C. Morrison, D. D., of Kentucky will do the preaching. Dr. Morrison is a forceful preacher. The meeting will continue about ten days. On last Thursday there was a big picnic at the camp grounds. At that time these arrangements were made. A large crowd is expected to attend this meeting.

Among the honors bestowed upon our county recently is the ownership of the state historic banner, which is for this year in the hands of Jo. Wheeler Chapter, U. D. C. This chapter, though small of membership has the proud distinction of having won the banner for two consecutive years, a height to which no other chapter in Tennessee has ever attained. Along educational lines this chapter is alert, having adopted as its slogan, "Truth in History."

Charles Galloway Blackard, son and son of Dr. J. W. Blackard of Fulton, Ky., has just been awarded the \$25 gold medal for best debater in Emory and Henry College, Virginia. This is the second medal won by him in oratorical contests and makes the seventh medal on a string won by his husband and sons. Young Blackard, who is completing his junior year in Emory and Henry is well known here and has a number of friends who will be delighted to hear of his preference.

Dr. T. W. Cooper died at his residence in this city yesterday at 12 o'clock, aged 87 years. Funeral services will be held at the residence this Friday, afternoon at 3 o'clock, conducted by Rev. C. V. Crabbs, assisted by Revs. A. C. Bell and E. L. Atwood. Interment at Oakwood cemetery. Dr. Cooper had been in declining health for many months and his death was not unexpected. He was one of the oldest and most honored men in this community, a consistent member of the Presbyterian church, loved and honored by the entire population of this city. The influence of his long and useful life will rest as a sweet benediction upon this entire county.

Through the courtesy of Miss Julia Louise Jarratt the States-Graphic received an invitation to the graduating exercises of the high school at Fort Worth, Tex. Miss Jarratt is a daughter of Mr. W. S. Jarratt, who formerly resided here.

Evangelist W. N. Holliday of the Harbert Avenue Church of Christ, Memphis, will preach at the courthouse Sunday afternoon and evening. Subject at 3:30 in the afternoon will be "Sin;" evening at 7:30 will be "The Ten Commandments." The public is cordially invited.

WATCH THE LICE.

On chicks. These parasites sap the very life blood out of them. Dust the hens at night with B. A. Thomas' Louse Killer and your troubles are ended. It also kills bugs on cucumber, tomato and squash vines. We sell it to you and if it does not make good, we will. Short & Collins ju

It don't make any difference what kind of car you drive, you can find the supplies of R. N. Bond Auto Co. 29

METOL KEPT IN BANK VAULT

Chemical Used by Photographers Has Become So Scarce That It Is Now Almost Priceless.

Beloit, Wis.—Metol, one of the most needed ingredients in the developing of photographs, has become so scarce on the American market that a Beloit photographer has taken his supply to a safety deposit vault in a local bank.

C. E. Wright, a local photographer, says that a short time ago he removed from its hiding place in his studio a package containing four pounds of the precious metol and took it to a bank. According to Mr. Wright, photographic supply companies gave their last quotation on metol more than two months ago, since then it has been practically impossible to obtain it.

Before the European war metol was quoted at about \$4 a pound. Its last quotation was \$4 for the same quantity, and it is now estimated that the value of the stuff is increased to nearly \$100.

Other Beloit photographers are guarding their supplies of metol also. Those who had foresight laid in a stock of chemicals while the "laying up" was good. Advice to the photographic supply trade is to the effect that the prices of photographic paper and other materials essential to the business have advanced so that soon photographers will be forced to increase their rates 100 per cent.

Hydroquinone, a chemical which in time may have to be relied on entirely for developing has advanced from 62 cents to \$7.50 per pound and potassium bromide is now quoted at \$4.75 per pound, as against 39 cents before the war.

PROVIDING A YEAR'S WORK

(By C. E. Allred, Division of Extension, University of Tennessee.)

No matter how profitable a crop may be, there is a limit to the amount that can be raised with a given amount of land. And the farmer who farms to usually fairly constant for a given year. As only a small fraction of the year can be devoted to one crop, the farmer must determine the combination that will give the greatest returns for the year's work.

Cotton, corn and tobacco have been the great crops in the south. But the work on these conflicts seriously, particularly in the northern part of the cotton region. Further south cotton and corn go together better. Cotton interferes with most other crops. This is one reason why cotton farming has so often been a one-crop system.

No one should expect to make a very large profit from farming, unless his business provides a full year's work. It is even more important and difficult to provide a full year's work for horses than for men. The first step is to decide on the rotation to be used; the next is to lay out the fields to fit it.

This work is not like play. It requires all the thought that a farmer can give it. He must plan for his own conditions and farm. Others may suggest, but in the end he must do all the planning himself. The profits or the losses on the adopted plan will be his.

Yes it's
MASTIC PAINT
"The Kind that Lasts"

Contains highest Percentage of ZINC

It is the unsurpassed combination of the finest Pure White Lead, ZINC-OXIDE and genuine Linseed Oil.

MASTIC PAINT presents a uniform, beautiful, enamel-like finish, that will resist the weather conditions in any climate.

It lasts longer—looks better—covers more surface than any other paint. Ask for Illustrated Book, "Houses and How to Paint Them." It's Free.

COPPEDGE
DRUG COMPANY

Right HERE for Your HARDWARE

Spring and Summer work on the farm, at the home and in the garden requires the purchase of considerable hardware and tools. We want you to make these purchases at this store. We want to prove to you that there is no place in this community where you can get better goods for less money than we sell. And when you buy from us, you take the proof home with you.

FRIEND OF COTTON GROWERS

Immense Loss Sustained in Texas Because Quail and Prairie Chicken Are Almost Extirpated.

The cotton growers of Texas are losing \$40,000,000 to \$50,000,000 a year by reason of the ravages of the boll weevil; and all because the quail and the prairie chicken, the natural enemies of that bug, have been practically exterminated in that great state.

The cotton boll weevil is moving like a great army to the eastward and to the northward, and scientists sent to study the situation tell us it will go to the Atlantic ocean before it stops, and as far north as cotton is grown, unless all killing of birds is prohibited.

The wheat growers of the United States are losing over \$100,000,000 a year by reason of the ravages of the chinch bug.

Why? Because the quail, the natural enemy of that bug, has been almost exterminated.

The farmers of the middle and eastern states are paying out \$15,000,000 a year for paris green to put on their potato vines.

Why? Because the quail, the natural enemy of that bug, has been killed off.

Each of the great apple producing states are paying \$1,000,000 to \$3,000,000 a year for spraying apple trees, to keep down the codling moth.

Why? Because the woodpeckers, the sap suckers, the robins, the bluejays, the bluebirds, the orioles, the tanagers and other birds that formerly preyed on that insect have been killed off.

Here are a few records as to the value of certain bug eaters:

A quail killed in a cotton field in Texas had in his craw the remains of 127 cotton boll weevils.

Another killed in a potato field in Pennsylvania had in his craw the remains of 101 potato bugs.

Another killed in a Kansas wheat field had in its crop the remains of over 1,200 chinch bugs.

STOP LEAKS IN FARM WORK

System of Coordinated Effort Should Be Worked Out and See Where Savings Can Be Made.

One of the great things on the farm is to see that the leaks are looked after, not only stopping one leak, but also the taking of a general survey of all the departments of farm work, endeavoring to make a saving wherever there is a loss. Most of us are familiar with the story of the Holland boy who discovered a leak in the dyke, and stuck his thumb in it to keep the sea from breaking through and flooding the land below. The story goes that the leak grew in size and the lad was forced to put in his fist, then his arm, then his body. As we recall it now, at that point the story ends and nothing was told us regarding the later repairs or about the funeral of the boy.

From this fable we gather an idea regarding the farmers who are in the habit of discovering leaks in farm work, and for awhile the farmer endeavors to stop up the leak, then he may discover that there is another leak and forget about the first and what may be buried therein. It is better to not look at one of the leaks, but to investigate the entire system of farm practice to see if there is not an opportunity to stop more than one leak if they may be found. Some system of coordinated effort should be worked out. Such actions save a great deal of energy that is now expended in useless and ineffective spurts. The point is, endeavor to stop not only the main leak and then get lost in that effort, but look over the entire field of work and see where savings can be made in all lines.

Starting With Poultry.

If not accustomed to poultry, begin with a small number. Learn to make a success with a few, then go on with a larger number. In a majority of cases those who have made the biggest success in the poultry world and are yet in the business worked up from a small beginning.

MAMMOTH CAVE
